About me

Entrepreneur in Residence @ UCL

Director of Business Analytics MSc

Lecturer in AI and Innovation @ UCL & LSE

Postdoc in Innovation and Technology Transfer

PhD in Artificial Intelligence

MBA Electives London Business School

MSci in Artificial Intelligence

Chief AI Officer @ WPP

CEO @ Satalia

Investor in AI-enabled purposeful companies

Co-founder of the Faculty AI

Advisor to Syntropy, e-Numeracy and others

Kauffman Global Scholar

Startup mentor and speaker

Innovation

Hidden dynamics in hierarchy

Being Adaptive

8 Important Trends (Corporate Rebels)

1. Profit → Purpose & values
2. Hierarchical pyramid → Network of teams
3. Directive leadership → Supportive leadership
4. Plan & predict → Experiment & adapt
5. Rules & control → Freedom & trust
6. Centralized authority → Distributed decision making
7. Secrecy → Radical transparency
8. Job descriptions → Talents & mastery

Innovation, Motivation and Purpose

“Creativity that ships”

Steve Jobs

“Motivation is the Energy for Action”

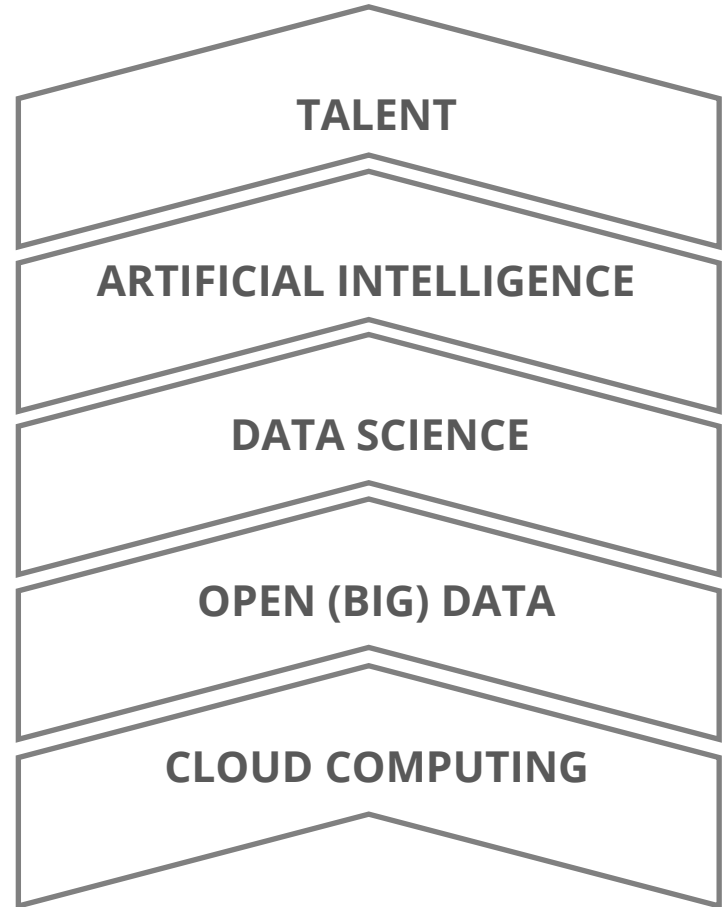

Edward Deci

“Autonomy, Mastery, Purpose”

Dan Pink, Drive

“Time is the new money”

Richard Branson

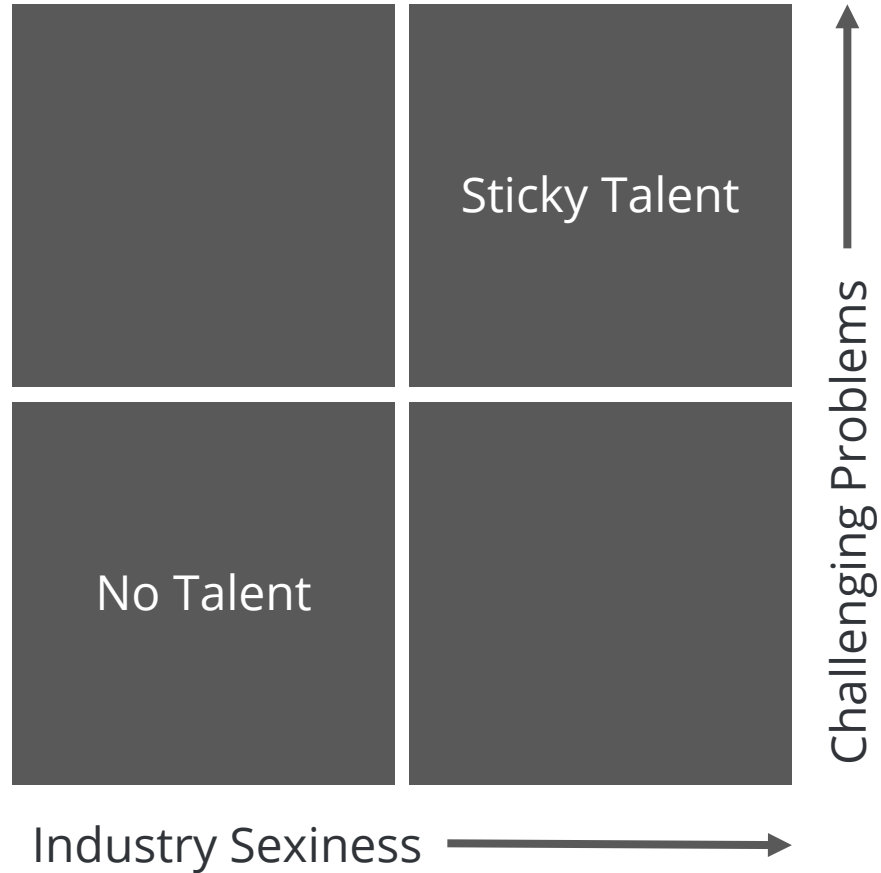

Talent Strategy

Organisational Network Analysis

Swarm diagrams provide transparent data on activity across network tools.

Swarm diagrams show the significance of points and the weight of opinion compared to the suggestions received by others within the organisation.

Visualisation of two-way working relationships from combined network tools and location

Interactive network diagrams show relationships and the flow of information from and to the worker.

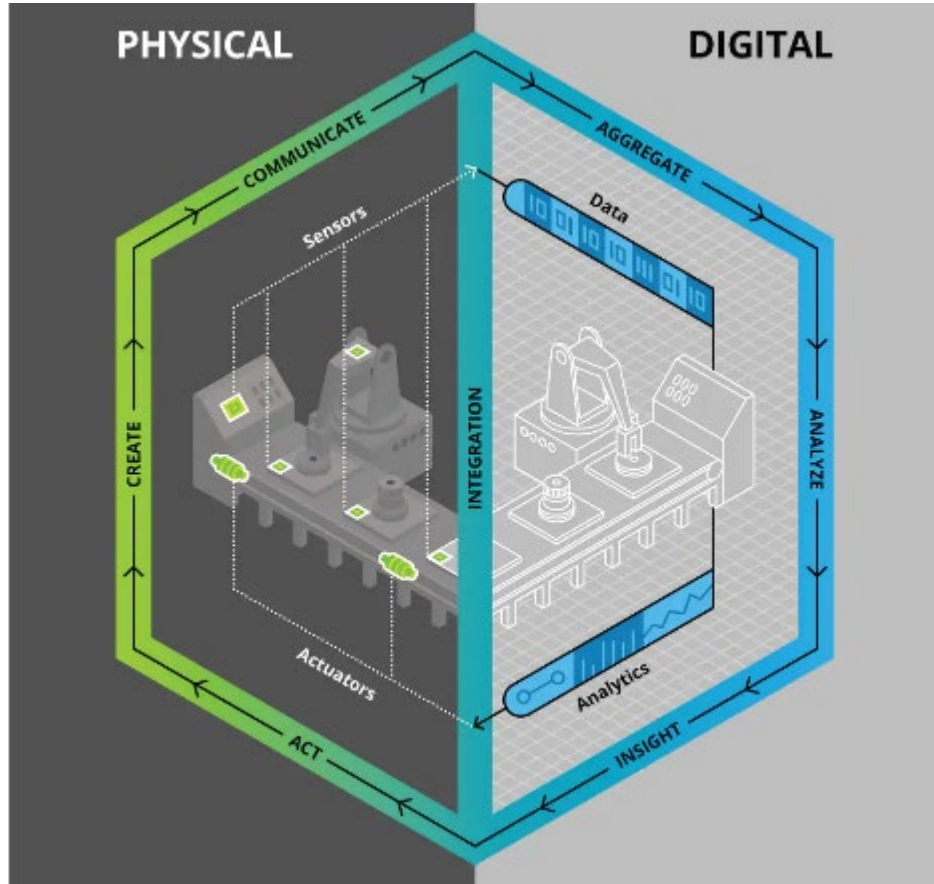

Board 1	Approved	Reduce your request	Increase your request
Total votes	426	16	261

Board 2	Approved	Reduce your request	Increase your request
Total votes	434	0	212

Digitization

Three maturity levels:

- Digital Transformation
- Digital Twins
- Digital Cognition

Three types of Twin

- Operations
- Workforce
- Processes

Identifying Opportunities

#	Map	Opportunity	Comments
1			
2			
3			
4			
5			
6			
7			
8			
9	7	Construction requirement forecasting	
10	9	Construction Workforce Allocation	Contractors are a massive cost
11	5+10	Field Service Optimisation	Nuances requires more customisable solution
12	6	Supplier confidence prediction	Huge problem, also needs automation

Mapping Opportunities

1. Task automation
2. Content generation
3. Human representation
4. Extracting insights from data
5. Complex decision making
6. Extending abilities of humans

#	Map	Opportunity	Comments
1			
2			
3			
4

12	6+[4]	Supplier confidence prediction	3	1	2	1	3	2	2	3	3	Huge problem, also needs automation

The Future

PESTLE of Singularities

“The nation that **leads** in **AI** will be the ruler of the **world**”

Political.

Environmental.

Social.

Technological.

Legal.

Economic.

Political. we no longer know what is true

Environmental. we have uncontrollable ecological collapse

- Environmental and technological risks continue to rise

- Geopolitical and societal risks are stable but remain high
- Economic risks perceived as low both in likelihood and impact

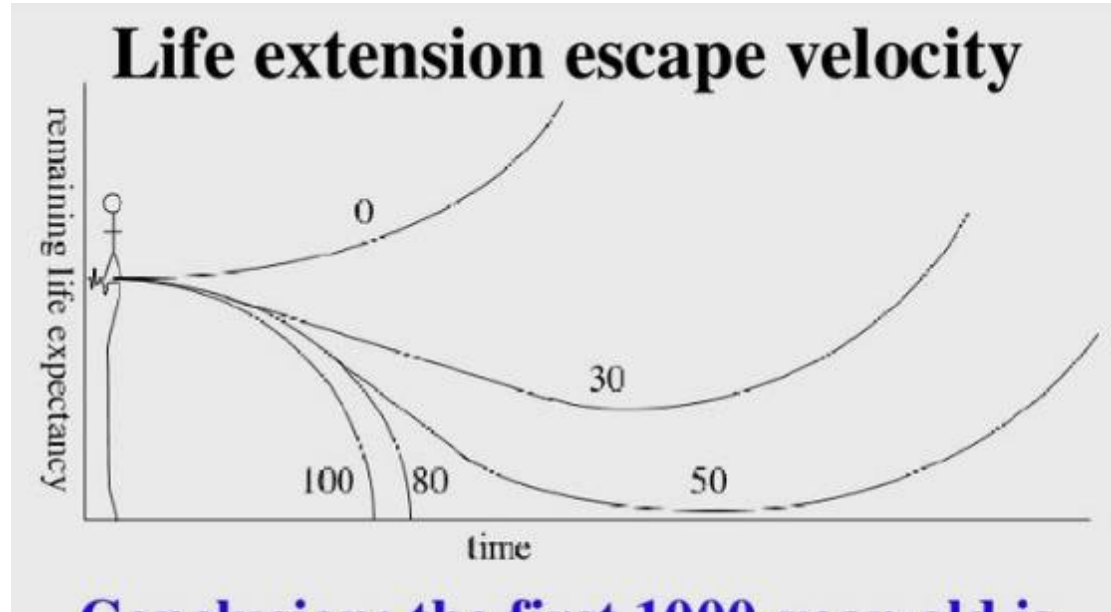

- Environment -related risks again lying in the higher -impact

- Top likely global risks are extreme weather events

- Previous years respondents to the GRPS tended to be optimistic about technological risks, this year’s concerns jump
- Cyber attacks rank 3rd global risks in both likelihood and impact
- Data fraud and theft rank as 4th global risks in terms of likelihood
- Geopolitical risks expect to worsen due to political and economic confrontations/frictions between major powers
- Most interconnected risks were “adverse consequence of technologies” and “unemployment and under-employment”, both highly connected with “profound social instability”

Social. we cure death

Conclusion: the first 1000-year-old is probably only ~10 years younger than the first 150-year-old

Technological. we create a Superintelligence

THE MIT PRESS ESSENTIAL KNOWLEDGE SERIES

Legal. surveillance becomes ubiquitous

Economic. we automate the majority of labour

Purpose and Vision

THE ACQUISITION OF
WEALTH IS NO
LONGER THE DRIVING
FORCE IN OUR LIVES.

WE WORK TO
BETTER OURSELVES
AND THE REST OF
HUMANITY.

- CAPTAIN JEAN-LUC PICARD

Satalia's Vision

**Everyone free to live
beyond themselves**

WPP's Purpose

**We use the power of
creativity to build a
better future**
